

Letter of Collaboration to Flagship Project

Energy Transition – Systemic (r)evolution

Tampereen kaupunki, City of Tampere expresses its interest to collaborate with the Flagship Programme Project Energy Transition – Systemic (r)evolution led by University of Vaasa and including partners LUT University, Tampere University, and VTT. We find the suggested project important and essential for Energy sector renewal and competitiveness of Finland in European and global context. This effort will create new solutions and deepens the cooperation between our organisations. We understand that this Flagship Programme will bring together expertise from different fields and will increase the quality and effectiveness of Finnish research in the energy sector in all levels with concrete impact in society and marketplace.

The Energy Transition – Systemic (r)evolution -project aims to deliver evidence-based, sector-coupled energy transition pathways that enhance competitiveness, affordability, sustainability and resilience, while ensuring a just transition and high carbon handprint. Our collaboration in the project will consist of

- Taking part in the project's collaboration and stakeholder network

We therefore fully support this initiative. We encourage the funding of this project and wish every success to the project team and to the accomplishment of the proposed work. We are looking forward to the cooperation opportunities that the project will bring us.

This Letter of Collaboration is signed electronically.
